Hi Dave,

We can confirm that temperature has been added to the monitoring requirements as outlined in MTE's Feb 7, 2020 letter.

Thanks to you and Ian for the quick turnaround.

Neal

Hi Neal, this looks good, can you just confirm re the item below identified by Ian?

Thanks!

Dave

Hey David

Yes I am in agreement. But I did want to make sure that they have added temperature to the monitoring requirements (Comment #3) as they said they were going to do this. I agreed with that statement so I didn't make it a recommendation per se. Other than that, everything looks good.

Hi Ian,

It looks like remaining items have been addressed by the consultant for Shantz Station Pit. Can you advise if you agree?

Cheers,

Dave Welwood

Hi David,

We have reviewed BluMetric's comments and Capital is in agreement with the two remaining recommendations. Please find attached our confirmation letter. These commitments will be added to the ARA site plan.

If you have any questions, please let us know.

Thanks

Neal

Special Note: Due to the Covid-19 outbreak, all our staff are working remotely and our offices are physically closed. We will make this transition as seamless as possible and we remain available during business hours.

Hi Jeremy,

The BluMetric response to the MTE follow up to the peer review of the Hydrogeological Study is attached. Neal - please advise if you have any further comments.

Regards,

David Welwood

Hey David

Here is the reply to the MTE response. I have included our original comments, MTE's response and our reply for each comment in the letter. I have marked it as final in hoping to save some time but if you have comments or would like to see changes, then by all means let me know and I can make the revisions.

Thanks and talk to you soon.
